EDUCATION

Illinois Institute of Technology, Chicago, IL, USA

Expected May 2025

Master of Information Technology and Management, 3.6

Key Courses: Object-Oriented Application, Project management, Coding Security, Cloud Computing, Modeling.

University of Pune, India

June 2016 - April 2020

Bachelor of Engineering in Information Technology

Key Courses: C, Data Structures, Java, Software Modeling, High Performance Computing, Data Analytics, Database Management.

EXPERIENCE

Software Developer

Anikaay Integration, India

March 2022 – June 2023

- Led the redesign of an enterprise organization's e-commerce website, employing HTML for structure, CSS for styling, and JavaScript for interactivity, achieving a **30% increase** in user engagement and a **20% boost** in conversion rates.
- **Contributed** significantly to the development of multiple dynamic e-commerce websites, MIS applications, and creative landing pages, utilizing React.js for frontend development, tailwind for styling, Webpack for bundling, and various Frontend Build Tools, resulting in tangible business outcomes.
- Facilitated seamless software transactions on an e-commerce platform, contributing to a **15% growth** in client acquisitions, showcasing proficiency in version control with Git and project management with JIRA.
- Crafted visually captivating static landing pages that achieved a **40% higher** click-through rate, employing skills in JavaScript for interactive elements.
- Collaborated effectively with cross-functional teams to deliver high-quality solutions, demonstrating strong problem-solving skills and attention to detail, and utilizing Visual Studio Code for efficient coding.

Software Tester

GlobalStep, India

August 2020 – March 2022

- Conducted comprehensive functional, performance, and regression testing, ensuring the quality and reliability of software products.
- Collaborated with cross-functional teams to identify and document software defects, contributing to effective issue resolution.
- Developed and executed test plans, test cases, and scripts, adhering to industry best practices and project requirements.
- Implemented testing automation to streamline repetitive tasks, significantly reducing testing time and improving overall efficiency.
- Played a key role in optimizing software performance, contributing to the successful launch of projects, including notable titles like Scarlet Nexus and Hood.
- Mentored team members in testing methodologies, fostering a culture of continuous improvement and knowledge sharing.
- Engaged in effective communication with clients and project managers to facilitate a collaborative development process.

PROJECTS

Discover Food

October 2023 – December 2023

- Designed and built a restaurant discovery platform, enabling users to effortlessly explore crucial details such as location, ratings, operating hours, cost, contact numbers, and cuisine options, cutting search times by 25%.
- Designed and implemented a hierarchical access structure, optimizing restaurant data management and prioritizing a user-friendly experience for a wide range of dining options.

SKILLS

Languages and Scripting: Core Java, C, HTML, CSS, JavaScript.

Frameworks: React.js, JavaFX, Scene Builder.

Tools: Microsoft Office, Project plan 365, Eclipse, IntelliJ Idea, Apache NetBeans, Payara Server, Visual Studio Code, Scene Builder.

Cloud Technologies: AWS, Microsoft Azure, Goo.

Databases: Oracle, MySQL, PostgreSQL, MongoDB.

Operating Systems: MacOS, Windows, Linux.

Concepts: Agile, MVC, REST APIs, Object Oriented, Functional, Frontend, Backend, Web Design, System Design, SEO, Data-driven, CI/CD, Compliance testing, regression testing, Functionality testing.
